

Upgrade your audio experience with the AX5125H 5.1.2 channel soundbar with a wireless subwoofer and wireless rear speakers. The AX5125H's 500 watts of sound fills the room with a 9-speaker array that also projects sound overhead, making the most of Dolby Atmos. The dedicated wireless rear channel speakers create an immersive, true surround sound experience. 7 audio enhancement modes, including movie, music, game, news, sport, night and AI mode, optimize sound specifically to the content or time of day. And, eARC provides a simple one cable connection with the included HDMI cable. Bluetooth audio makes it easy to connect your phone, tablet or laptop wireless to enjoy music and more.

5.1.2 Surround Sound

9 speakers built into the soundbar. Left and right front channel, center channel, left and right rear surround channel, surround the listener in 3D audio for room-filling sound that delivers a true Dolby Atmos experience.

Dolby Atmos

Whether you're gaming, watching your favorite movie or show, or listening to that new track on repeat, Dolby Atmos enhances the entertainment you love across all of your devices. It goes beyond ordinary listening by transporting you with the breakthrough spatial sound experience that draws you in deeper, so you hear and feel more.

Roku TV Ready

As Roku TV Ready device, the Hisense AX5125H Soundbar is fully compatible with any Roku TV through the HDMI (eARC) connection. You can even use the Roku TV remote to control both the TV and soundbar for easier setup and better navigation experience.

Wireless Subwoofer

A wireless subwoofer delivers the robust low-end frequencies that punctuate your favorite movies, music, and games, without any messy wires. You'll feel the "boom" while the two front-facing speakers project bright, clear high- and mid-range frequencies.

Wireless Rear Speakers

While some soundbar packages can create a "virtual" surround sound experience by manipulating frequencies, the AX5125H comes with a pair of dedicated wireless rear speakers that truly immerses the listener and make set-up a breeze.

Wireless Music Streaming

Wireless Bluetooth technology easily connects to smart devices so the listener can enjoy their favorite playlists from their phone or other wireless devices.

Easy Connectivity

With HDMI (eARC), the Hisense AX5125H can connect to your TV through a single HDMI cable (included), connect wirelessly via Bluetooth, and control both with one remote. You'll be enjoying better TV sound in minutes.

Quick Touch EQ Modes

Get the best audio performance from music, movies, and news with a simple touch of the remote with 7 preset EQ settings.
