High Dynamic Range

Perfect for Home Theater

At 2200 ANSI Lumen peak brightness, the PL1 shines with brilliance so that everything you watch hits those sparkling highlights, voluminous colors, and deep blacks. PL1 is perfect for home cinema, be it in the media room or dedicated theater room.

Dynamic Contrast

Cinematic Audio-Visual Enjoyment

Enjoy an authentic movie experience with cinema's leading technologies. Dolby Vision HDR dynamically optimizes color, contrast and brightness, so you can watch each scene as the creator intended. And with the sensation of sound moving all around and above you, Dolby Atmos helps you feel like you're right inside the action.

Dolby Vision Atmos Top-Firing Speakers

Google TV

Google TV brings together movies, shows, and more from across your apps and subscriptions and organizes them just for you. Discover new things to watch with recommendations based on what you watch and what interests you.

Digital Lens Focus

Dial-in image focus from the convenience of your couch. Digital Lens Focus allows you to adjust the projector's focus mechanism with your remote – no need to mess with a focus wheel.

Filmmaker Mode

Filmmaker Mode disables any motion processing adjustments from the projector settings to ensure you're seeing content exactly the way the moviemakers intended.

Game Mode & ALLM

No need to manually change picture settings when you're about to drop in. Auto Low Latency Mode detects when a gaming console is the active source and automatically adjusts projector settings to optimize game performance.

25,000 Hour Laser Life

X-Fusion™ laser light technology provides up to 25,000 hours of entertainment without any loss in laser performance. And forget LED projectors with their slow warm-up time – the PL1 has instant-on laser light to set the perfect picture immediately.

WiSA Ready

Integrate Laser Cinema with your wireless multi-channel surround sound system – the PL1 is WiSA ready.

Auto Geometric Calibration

Place the PL1 Laser cinema within an appropriate position in front of the screen or the wall, activate the auto geometric calibration function to solve the problem of image and screen alignment which greatly makes Laser projector simplicity use.

Buttery Smooth Motion

With the PL1's microsecond-level processor response, you never miss a moment of the action. Fast-moving images are buttery smooth and crystal clear – so whether its sports, games, or action films the PL1 keeps pace.

Smart Home Ready

Built-in WiFi, Bluetooth, Airplay and Apple Home, Google Assistant, Works with Alexa, and Control4 compatible, the PL1 can be integrated with your smart home ecosystem to create automations to your heart's content.

Eye Safety

The PL1 takes eye safety seriously with its eye-protection function that dims the picture when something gets a little too close. This is also a great way to keep little kids from touching the projector. Of course, you can always turn Eye Safety off.
