

HISENSE'S NEWEST TV SOUND SYSTEM COMBINES WIRELESS FREEDOM WITH IMMERSIVE SOUND

New TV audio system delivers immersive 5.1.4-channel Dolby Atmos® sound with True Wireless Rear Surround and Hi-Concerto Technology for a more cinematic experience

SUWANEE, GA (March 20, 2025) – [Hisense](#), a global leader in consumer electronics, is redefining home audio with the introduction of the AX5140Q Sound System. Designed for audiophones who demand immersive, high-performance sound when watching TV the AX5140Q delivers a truly immersive, next-level audio experience with 5.1.4-channel Dolby Atmos, True Wireless Rear Surround, and Hi-Concerto Technology.

Surround Sound Elevated

With a total of 13 speakers, including up-firing drivers and a 6.5-inch subwoofer, the AX5140Q delivers precise, multidimensional soundscapes to enhance any viewing experience. Whether it's the deep rumble of a motorcycle, crystal-clear dialogue, or the immersive sound effects of an explosion, the system brings movies, music, and gaming to life. With a new intelligent feature that enables the system to analyze the acoustics of a room and optimize sound output, the AX5140Q delivers the perfect balance of depth, clarity, and power in any space.

Seamless Integration with Hisense TVs

The AX5140Q features Hi-Concerto Technology for perfectly synchronized sound performance when paired with Hisense TVs. Instead of disabling the TV's speakers, Hi-Concerto works in harmony with the TV speakers to create a broader, more immersive soundstage, enhancing depth, spatial audio effects, and dialogue clarity to ensure a richer and more dynamic audio experience that fills the room.

True Wireless Rear Surround for Flexible Setup

The AX5140Q features True Wireless Rear Surround speakers, allowing for greater placement flexibility and a clean, clutter-free setup compared to a wired system. Coupled with Pure Surround Tech, the system delivers a fully immersive, cinematic experience without limitations.

Powerful Performance, Effortless Control

The AX5140Q delivers thunderous bass, crisp highs, and immersive surround sound. With support for HDMI In, 4K 60Hz passthrough, Bluetooth 5.3, and EzPlay compatibility, the system is designed to connect seamlessly across multiple devices.

Pricing and Availability

The Hisense AX5140Q Sound System will be available starting this summer for \$399 at preferred Hisense retailers, as well as through [Hisense Shop](#).
